

2022 FORD MAVERICK 1.5" SST LIFT KIT

ReadyLIFT[®] is excited to announce that we now offer an all-new 1.5-inch premium-grade Smart Suspension Technology (SST) Lift kit for the brand new 2022 Ford Maverick™ AWD compact truck. The new 2022 Ford Maverick has quickly become a popular choice for small truck crossover-style enthusiasts. Every adventure-based vehicle performs better when given a quality suspension height improvement to increase ground clearance and provide gracious clearance for larger off-road-inspired wheels and tires.

ReadyLIFT SST Lift Kt #69-22150 is specifically engineered for the all-new 2022 Ford Maverick 2.0L EcoBoost AWD model. The kit utilizes our innovative offset-designed, fabricated heavy-duty steel plate top mount strut extensions to maintain factory alignment geometry for superior performance, ride, and handling even with an additional 1.5" of lift. Factory rear suspension geometry is also retained thanks to our rear spring spacer/sub-frame spacer combination. This kit delivers easy bolt-on installation. This new Ford Maverick SST Lift Kit maintains the factory driving dynamics while accommodating up to a beefy 245/65-17 tire on a 17x8 wheel with +40 mm offset. (Fitment is stated using Falken Wildpeak A/T3W tire and Motegi Racing MR144 M9 wheels. Minor trimming may be required depending on tire brand and tread design.) This 1.5" lift system provides a taller stance increasing ground clearance.

Features & Benefits:

- Engineered to retain the factory ride and handling (excluding replacement tire ride and handling characteristics).
- Offset design adjusts the position of the front strut to avoid interference and assist with maintaining the natural lifespan of the strut in a leveled configuration.
- Provides 1.5" of lift for added ground clearance and the ability to run larger wheels and tires.
- Allows for up to a 245/65-17 tire on a 17x8 wheel with +40 mm offset.
- Works with the factory FX4 drive modes.
- Easy to install in 4 hours.
- **Not for use currently on 2.5 Hybrid Engine equipped FWD models.**
